## Hay Mowing

Other machines were also developed to help the farmer. Mules were a very important farm animal in 1770. They were replaced by tractors. Today farmers use mechanical cotton pickers, milking machines, and hay balers. These are only a few of the many machines that aid the farmer.

Ahna Huber on Mower

*Cutting & Mowing*

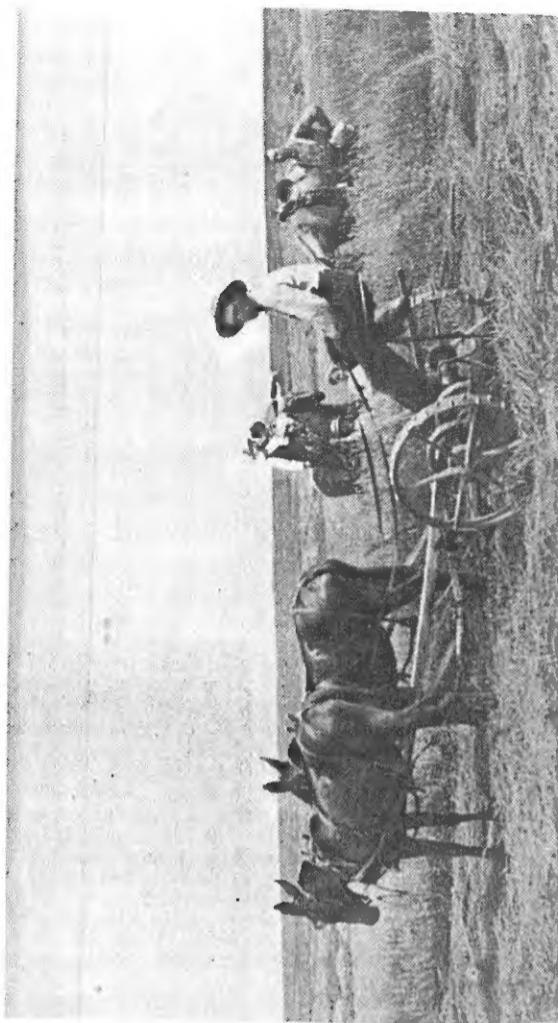

*Hay Mower*

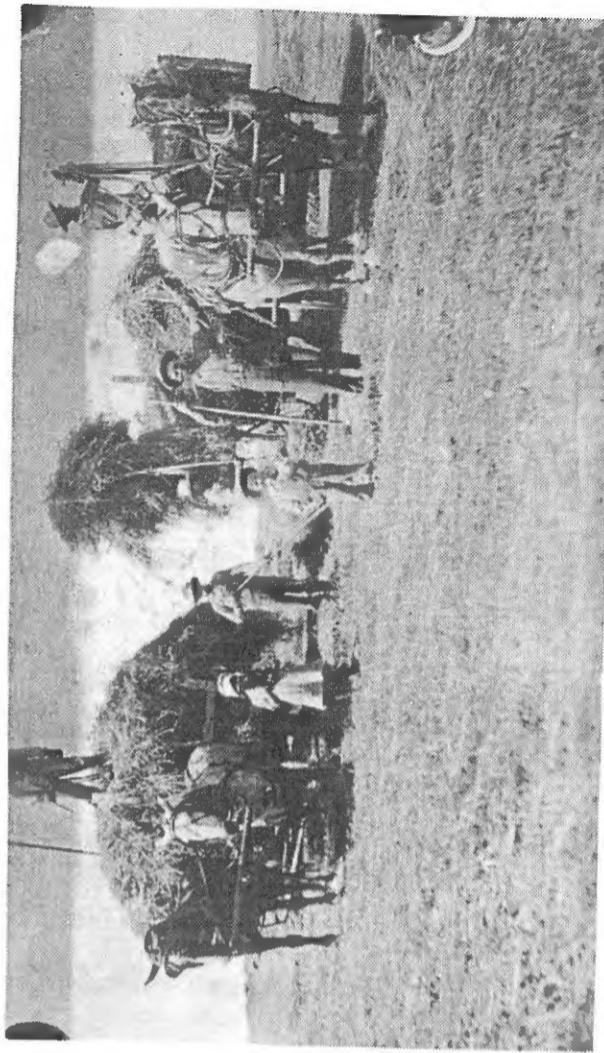

This farmer in Illinois is cutting hay. He will feed it to his dairy cows during the cold winter months.
